The month of June was above average in terms of rainfalls and temperature. In the middle of the month, the rainfalls were of a stormy nature. There was a greater amount of rainfall and hail. In total were damaged approximately 150 ha. The extent of damage ranges from 10% to 60%, which should not affect the total production of hops in the Zatec region.

### 2. Health evaluation of hops

Most of the hop gardens reach the top of the construction. We evaluate the health status of hops as good. Chemical protection of hops against fungal diseases as well as aphids and spider mites continued.
